IHP listens to your needs.
The institute expands to a new building offering 1100 square meters of additional space dedicated to scientific activities, and welcomes new programme formats of 3, 6 or 12 weeks.
Two buildings for one objective: fostering scientific exchange at the topmost level.

Submit your projects now!
IHP is open to all disciplinary fields around mathematics, physics, computer science and their interfaces with related disciplines (biology, climatology, neuroscience, etc.).

Thematic programmes
3 / 6 / 12
Coordinated by an organizing committee of two to four researchers, assisted by an international scientific committee, a thematic programme can last three, six or twelve weeks and accommodate between 50 and 120 international scientists for conferences, courses and seminars.

Project submission deadline

- **May 15th 2023**
  for long programmes (12 weeks) in 2026
- **May 15th 2023**
  for short programmes (3 or 6 weeks) in 2025

Research in Paris
This programme is ideal for developing or finalizing a project with a small group of collaborators who are geographically distant and can gather at IHP over a period of one to six weeks.

Project submission deadline
- **May 15th 2023** for Research in Paris between January and June 2024
- **October 15th 2023** for Research in Paris between July and December 2024

Doctoral training
If you have a doctoral course project that takes the form of lectures or intensive work groups, IHP will support you in its premises or in those of partner institutions.

Project submission deadline
- **May 15th 2023** for courses between January and June 2024
- **October 15th 2023** for courses between July and December 2024

The assets of IHP:
- An institute of excellence in the heart of Paris
- Substantial financial support
- An automated audiovisual recording system with live broadcast on the IHP website and VOD on the platform CARMIN.TV
- A library with an exceptional collection of documents
- Two completely renovated buildings
- An experienced team specifically dedicated to the organization of your scientific activities
