

# Oscar Rutilio Molina Medrano

(My Friends call me Yulu)

- I'm from El Salvador (a beautiful country in Central America).

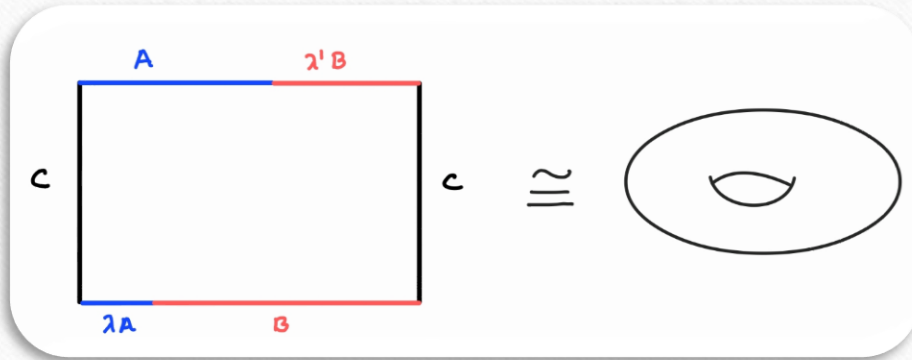

- I did my undergraduate studies at the Universidad de El Salvador (UES).

- Currently, I am a doctoral student at the Universidad Nacional Autónoma de México (UNAM) at the Centro de Ciencias Matemáticas (CCM) in Morelia under the guidance of Dr. José Ferrán Valdez Lorenzo.

# My Interests

- I am interested in the study of dilation surfaces and their Veech groups.
- I am very interested in studying dilation surfaces of infinite type, for example, those that are homeomorphic to the Loch Ness monster.

- I also really enjoy music and playing the guitar (I'm not good at it).
