Some estimates for harmonic metrics of G -Higgs bundles

jeudi 22 mai 2025 10:00 (1 heure)

There are some useful estimates for harmonic metrics of cyclic Higgs bundles and symmetric Higgs bundles. In this talk, we shall discuss generalizations of the estimates to the context of G -Higgs bundles. As applications, we shall also discuss the existence and the classification of some types of harmonic G -Higgs bundles. This talk is partially based on joint works with Qionglin Li and Szilard Szabo.
