

Newton and analysis: rethinking Marco's thesis after twenty years

vendredi 6 juin 2025 11:10 (1h 20m)

A study of Newton's mathematical archive allows us to examine in detail the role of algebra and calculus in Newton's work. In my talk, I will reconsider the pervasive role of 'analysis' in Newton's mathematics, which is often seen as biased towards geometry, a role already noted by Marco in his seminal monograph 20 years ago.

Orateur: GUICCIARDINI, Niccolò (Università di Milano)
