

On the mod p and p -adic Jacquet-Langlands correspondence for $GL_2(Q_p)$ and D^*

mercredi 29 octobre 2025 11:15 (1 heure)

I will discuss some consequences of the 6 functor formalism of Mann to the study of the mod p and p -adically completed cohomology of the Drinfeld tower. This is joint work with Colmez and Niziol, and independently with Rodriguez Camargo.
