

Project Numina and AI for Theorem Proving

jeudi 22 mai 2025 09:30 (50 minutes)

Project Numina develops open-source open-dataset AI for mathematics. Numina won the AIMO progress prize in 2024 and released NuminaMath, the largest open dataset of math problem and solutions. Numina released the KiminaProver last month, a SOTA formal math prover. We will present the past, present and future developments of Numina along with our AI for theorem proving approaches.
