

Families of symmetric and skew-symmetric matrices and vector bundles

lundi 23 juin 2025 11:00 (50 minutes)

I will report on joint work with A. Boralevi and M.L. Fania, about linear spaces and quadric surfaces contained in the Pfaffian hypersurface in P^{14} . I will then explain the connections with congruences of lines in the 5-dimensional projective space and with vector bundles

Orateur: Prof. MEZZETTI, Emilia (Università degli Studi di Trieste)
