

Iarrobino's symmetric decomposition: open questions and some developments

jeudi 26 juin 2025 15:00 (20 minutes)

We will discuss how Iarrobino's symmetric decomposition became a central numeric invariant for Gorenstein algebras and discuss the current state of the art: open questions and results related to completed quadrics and Iarrobino's scheme.

Orateur: Prof. JELISIEJEW, Joachim (Uniwersytet Warszawski)
