

Exponential networks and the life of partitions

mardi 8 juillet 2025 10:00 (1 heure)

Following a quick summary of exponential networks, I will describe in some detail the explicit correspondence, obtained in collaboration with Banerjee, Romo and Senghaas, between torus fixed points of the Hilbert scheme of points in the plane and anomaly-free finite webs attached to the quadratically framed pair of pants.

Orateur: Prof. WALCHER, Johannes (Heidelberg University)
