

## **A fundamental tool in Random Matrix Theory: the Cauchy-Stieltjes transform - Part 2**

*vendredi 16 janvier 2026 11:30 (1 heure)*

We will introduce the so-called Cauchy-Stieltjes transform of a probability measure on the real line and present some of its fundamental properties. Then, we will explain how this analytic tool can be used to establish asymptotic spectral properties of random Hermitian matrices when the dimension goes to infinity.
