Thursday 12			
14h00	15h00	Goffeng 1	Poisson transforms and the Baum-Connes conjecture
15h05	15h35	Alleysson	A Leftshetz fixed point theorem in K-theory for manifolds with boundary
15h40	16h10	McDonald	The easiest proof of Weyl's law
16h10	16h40	Coffee	
16h40	17h10	Portela	Geometric and Algebraic Perspectives on Gauge Theories
17h15	17h45	Chamoux	Representations of Lie groupoids and their bisections
17h50	18h20	Dautheville	A base point problem in p-adic SL(n)

Friday 13			
9h00	10h00	Goffeng 2	Poisson transforms and the Baum-Connes conjecture
10h05	10h35	Lemoine	Factorization of the Dirac operator on foliations
10h40	11h10	Le Breton	Weighted deformations of Lie groupoids
11h10	11h40	Coffee	
11h40	12h10	Hekkelman	Almost all drums sound awful
12h15	12h45	Massar	Quantization of nilpotent symplectic Lie groups
12h45	14h00	Lunch	
14h00	15h00	Clare 1	C*-algebraic Plancherel theorems
15h05	15h35	Carotenuto	Noncommutative Geometric Yang--Baxter solutions from bimodule connections
15h40	16h10	Lescure	Bruhat decomposition of operator algebras and noncommutative boundaries of buildings
16h10	16h40	Coffee	
16h40	17h10	Mao	Coarse indice for spaces with proper actions of étale groupoids
17h15	17h45	Chen	Isomorphism Between Universal and Reduced Yang-Baxter-Deformed Toeplitz Algebras
17h50	18h20	Thiry	A filtered approach to Fully Ellipticity

Saturday 14			
9h00	10h00	Clare 2	C*-algebraic Plancherel theorems
10h05	10h35	Malfait	Totally positive split real semisimple quantum groups of classical type
10h40	11h10	Masters	Lion taming by logarithm: a new representative of the γ-element for higher rank groups
11h10	11h40	Coffe	
11h40	12h10	Gebara	N-Fredholm operators between N-Hilbert spaces
12h15	12h45	Jaime	Group C*-algebras and p-summability
