

CONFERENCE ON ALGEBRAIC TOPOLOGY AND REPRESENTATION THEORY June 26-30, 2017 in Lille

The goal of this conference is to gather algebraic topologists and representation theorists around common algebraic interests, such as group (co)homology, Hopf algebras, equivariant theories, support varieties, or functorial and higher categorical methods.

To facilitate interactions between people of different backgrounds, the conference will be enriched by two mini-courses, one oriented towards algebraic topology and the other one towards representation theory : *Joseph Chuang* (London) and *Jesper Grodal* (Copenhagen).

Speakers

Tobias Barthel (Bonn)
Emilie Dufresne (Oxford)
Jonathan Elmer (London)
Eric Friedlander (Los Angeles)
John Greenlees (Sheffield)
Ellen Henke (Aberdeen)
Radha Kessar (London)
Nick Kuhn (Charlottesville)

Caroline Lassueur (Kaiserslautern)
Hai Nguyen Dang Ho (Hue)
Bob Oliver (Paris)
Nicolas Ricka (Detroit)
Beren Sanders (Copenhagen)
Radu Stancu (Amiens)
Jan Stovicek (Prague)
Peter Symonds (Manchester)

Scientific Committee

Natàlia Castellana (Universitat Autònoma de Barcelona)
Henning Krause (Universität Bielefeld)
Lionel Schwartz (Université Paris 13)

Organizing Committee

Baptiste Calmès (Université d'Artois)
Ivo Dell'Ambrogio (Université Lille 1)
Antoine Touzé (Université Lille 1)
