

On the direct problem in differential Galois theory

mardi 30 mai 2017 14:45 (45 minutes)

I will describe an algorithm that produces a system of generators of the Lie algebra of an absolutely irreducible linear differential equation over the field rational functions with complex coefficients.

This is a joint work with M. Barkatou, T. Cuzeau et J.-A. Weil.

Orateur: Mme DI VIZIO, Lucia (Université Versailles)
