Remarks on superforms and supercurrents

mardi 12 décembre 2017 15:30 (50 minutes)

This is basically a survey of Lagerberg's work on superforms and supercurrents, with some additions. We will illustrate the formalism with a proof of Weyl's tube formula and state a conjecture related to the Alexandrov-Fenchel inequality.

Orateur: Prof. BERNDTSSON, B. (Göteborgs Universitet)
