Remarks on superforms and supercurrents

Tuesday, December 12, 2017 3:30 PM (50 minutes)

This is basically a survey of Lagerberg's work on superforms and supercurrents, with some additions. We will illustrate the formalism with a proof of Weyl's tube formula and state a conjecture related to the Alexandrov-Fenchel inequality.

Presenter: Prof. BERNDTSSON, B. (Göteborgs Universitet)
