

Classifying (Weak) Coideal Subalgebras of Weak Hopf C^* -Algebras

mardi 9 avril 2019 14:15 (50 minutes)

We develop a general approach to the problem of classification of weak coideal C^* -subalgebras of weak Hopf C^* -algebras. As an example, we completely classify these weak coideals in the case of weak Hopf C^* -algebras associated with Tambara Yamagami categories (in common with J.M.Vallin).
