

# **Coupling model of the Richards equation and the transport equation**

*mercredi 26 juin 2019 14:00 (30 minutes)*

In this paper we solve the coupling system of Richards equation and Transport equation in 1-D and 2-D using a Finite volumes scheme. we test our model using cases of Heterogenous soil with non linear parameters for the one dimension case. In 2D we succeed to validate a first version of Richards using Diamant explicite Finite Volume scheme.
