

Cohomological Hall Algebras and Motivic Invariants for Quivers (4/4)

jeudi 15 juillet 2021 15:00 (1 heure)

We motivate, define and study Donaldson-Thomas invariants and Cohomological Hall algebras associated to quivers, relate them to the geometry of moduli spaces of quiver representations and (in special cases) to Gromov-Witten invariants, and discuss the algebraic structure of Cohomological Hall algebras.

Summary

Orateur: Prof. REINEKE, Markus (Ruhr-Universität Bochum)
