## jeudi 9 juin 2022

**Abstract: The moduli space  $\mathcal{M}_g$  of compact Riemann surfaces of genus  $g$  has been studied from diverse mathematical viewpoints for more than a century. In this talk, intended for a general audience, we will discuss moduli space from a dynamical perspective. We will present general rigidity results, provide a glimpse of the remarkable geodesic curves and surfaces in  $\mathcal{M}_g$  discovered during the last three decades, and explain how these algebraic varieties are related to the dynamics of billiards in regular polygons, L-shaped tables and quadrilaterals. (18:00 - 19:00)**
