

Journées de Mathématiques Appliquées

Conférence en l'honneur de Laurence Halpern

mercredi 21 janvier 2015

Session Poster (18:00 - 19:00)

time	[id] title	presenter
18:00	[33] Factorizations, Sweeping, Source Transfer, Potentials and Schwarz: One Algorithm	ZHANG, Hui
18:00	[34] Wave-Ray Multigrid Method for The 1D Helmholtz Equation A precise mathematical formulation and first analysis	WU, Shu-Lin
18:00	[32] A new approach for preconditioning discontinuous Galerkin discretizations	HAJIAN, Soheil
18:00	[31] Space-time domain decomposition methods for mixed formulations of flow and transport problems in porous media	
18:00	[30] Comparison of Neuman-Neuman and Optimal Schwarz Methods with Many Subdomains in one Spatial Dimensions	CHAOUQUI, Faycal
18:00	[29] Méthodes asynchrones de haute précision pour la modélisation de phénomènes multi-échelles	TOUMI, Asma
18:00	[28] Analyse d'erreur a posteriori et raffinement auto-adaptatif pour les éléments finis de frontière en acoustique	BAKRI, Marc
18:00	[24] D-solutions for doubly reflected BSDEs	Mme HASSAIRI, imen
18:00	[25] The variational spline method for solving Troesch's problem	M. BELHAJ, Zakaria
