

# On Moduli Spaces of Local Langlands Parameters (1/2)

*Friday, July 22, 2022 9:20 AM (1h 20m)*

The moduli space of local Langlands parameters plays a key role in the formulation of some recent enhancements of the original local Langlands correspondence, such as the “local Langlands correspondence in families” and various “categorifications/geometrizations of LLC”. We will explain their construction and basic properties, with special emphasis on the coarse moduli spaces.

## Summary

**Presenter:** Prof. DAT, Jean-François (IMJ-PRG)
