

Branching Laws: Homological Aspects

Monday, July 25, 2022 3:00 PM (1 hour)

By this time in the Summer School, the audience will have seen the question about decomposing a group's representation when restricted to a subgroup, referred to as the branching law. In this lecture, we focus attention on homological aspects of the branching law. The lecture will survey this topic beginning from the beginning and going up to several results which have recently been proved.

Summary

Presenter: Prof. PRASAD, Dipendra (IIT Bombay)
