

## **Ising model on random planar maps via Tutte's invariants**

*Wednesday, September 14, 2022 10:30 AM (1 hour)*

I will present a survey of recent and not so recent results about combinatorial random planar maps decorated (or not !) with a statistical physics model. I will put a special emphasis on the combinatorial aspects of this story. In particular, I will introduce and explain the method of Tutte's invariants to solve some functional equations.

**Presenter:** ALBENQUE, Marie
