

Alfonso Garmendia. E-manifolds and Poisson manifolds.

mardi 27 juin 2023 11:00 (1 heure)

Abstract: In this talk we will discuss the concept of E-manifolds (by Miranda and Scott) which are manifolds with a projective foliation. We will give some examples used in the literature, such as the case of b-, c-manifolds and 0-manifolds. We will also give some constructions on Poisson manifolds and these objects.
