

# **Dispersive Estimates for the Semi classical Schrödinger Flow inside General Convex Domains and Applications to the Cubic NLS in 3D**

*vendredi 26 mai 2023 09:30 (1 heure)*

We obtain fixed time decay rate for the linear semi-classical Schrödinger flow inside a general strictly convex domain.

Corresponding Strichartz estimates allow to solve the cubic NLS on such 3D convex domains. This is joint work with F.Planchon
