

Anosov Representations (3/3)

Wednesday, June 21, 2023 9:15 AM (1 hour)

This minicourse is an introduction to the theory of Anosov representations for non-experts. There will be three lectures in this minicourse. In the first lecture, we will discuss Anosov representations and their various characterizations. In the second lecture, we will discuss the construction of domains of discontinuity for Anosov representations, as well as their relationship with convex projective geometry. In the final lecture, we will discuss recent developments and possible research directions for Anosov representations.

Presenter: Prof. ZHANG, Tengren (National University of Singapore)
